

# NORDIC & FAT BIKE TRAIL MAP

3.02 MILES ROUND TRIP

## Fat Biking Best Practices:

- Yield to all other users when riding. Skiers don't have brakes but you do!
- Ride on the firmest part of the track.
- Do not ride on or in the classic tracks.
- Leave room for skiers to pass (don't ride side-by-side with all of your buddies blocking the full trail).
- Allow the track time to set up after grooming and before riding.
- Respect the minimum tire tread width of 3.5 inches.
- Be an ambassador for the sport: stay polite, educate other riders, discourage bad behavior and follow the rules.
- Consider donating money for trail grooming.

## Equipment Suggestions:

- Wide tires: deep snow coverage may require tires wider than 3.5 inches.
- Tire pressure will often be less than 10 PSI.
- Enough floatation that you can travel over snow without leaving a rut deeper than one inch.
- Sufficient traction that you are able to safely control your bike and ride in a straight line.
